These statements are based on careful laboratory tests and our practical experiences.

They are non-binding recommendations and are made to our best knowledge, but are given without any liability.

If you have any questions, we will be pleased to give you advice.

Explanations: + = resistant - = not resistant or not tested

Abbreviations and symbols

BIIR	bromo butyl rubber
CR	chloroprene rubber
CSM	chlorosulphonated rubber
IIR	isobutylene-isoprene rubber (butyl rubber)
NR	natural rubber
NBR	nitrile-butadiene rubber
SBR	styrene-butadiene rubber

Before using the material, please make sure, that you have the latest issue of our material description.

All statements in this description are in accordance with our current knowledge. Claims cannot be derived from it.
